Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11-17-09 has been entered.

Allowable Subject Matter

Claims 1 and 3-5 are allowed

The following is an examiner's statement of reasons for allowance:

The prior art teaches ferritic stainless steel pipes which are welded containing Ti and Nb and formed by multi-step processes. The prior art further teaches that it is advantageous to control the hardness difference between the matrix of the steel pipe and the hardness of the welded zone such as within the range claimed. However, the prior art does not teach or suggest forming a weld bead thickness having a weld zone thickness to matrix thickness ratio which is 1.05-1.3 in combination with the limitations as claimed. As is demonstrated in the instant Application in table 4, a welded pipe having the recited ratio of weld bead thickness exhibits improved expandability.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
